Java & Spring
In the
Financial Industry

Have you ever traded securities on major exchanges like NASDAQ, NYSE, or CME ?

Java

If so, there's a good chance your transactions were processed using the FIX protocol.
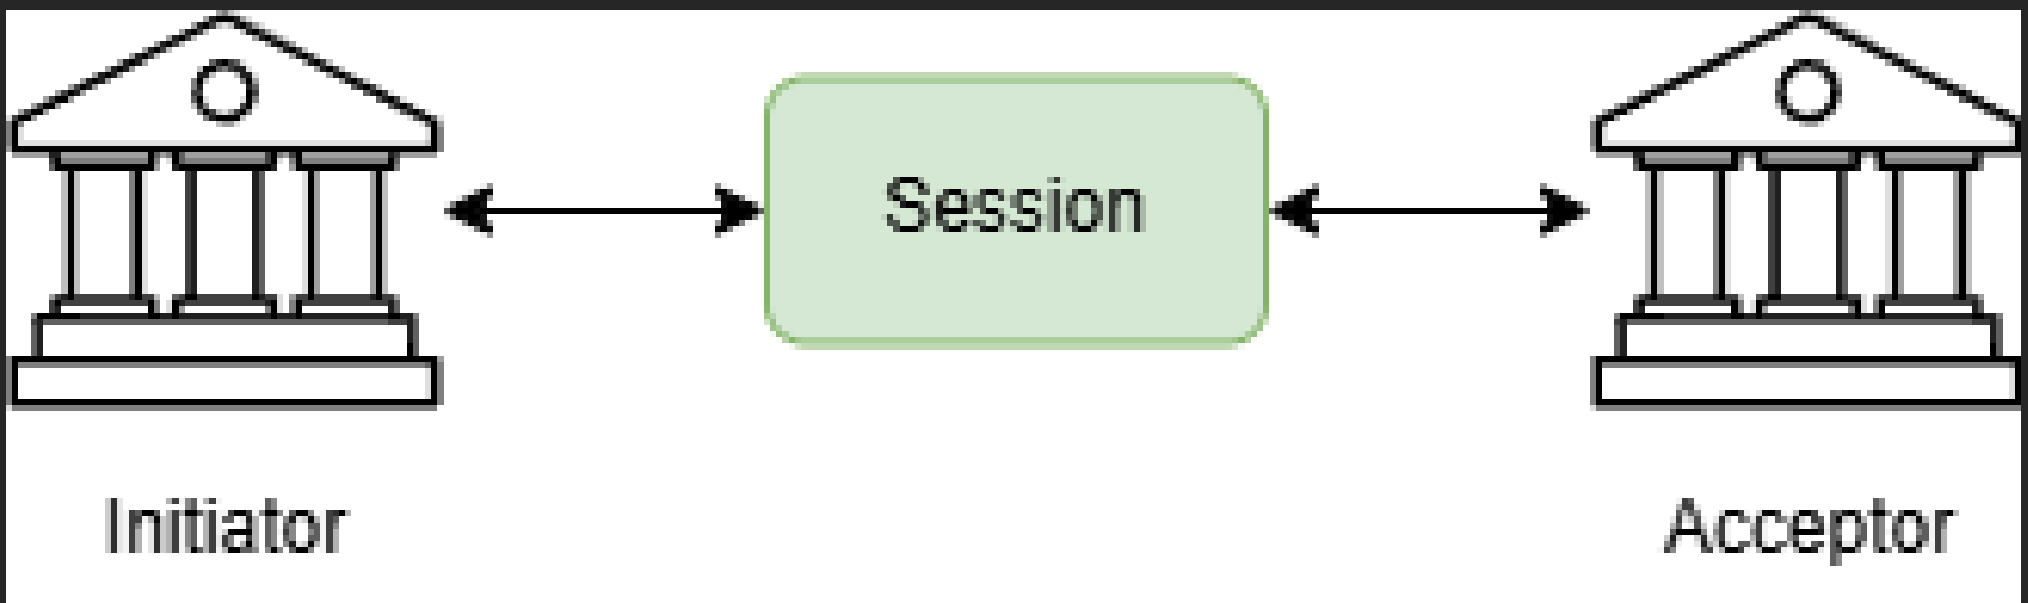

The Financial Information eXchange (FIX) protocol is a messaging standard designed to streamline the electronic communication of securities transactions.

It includes three entities.

Initiator — Session — Acceptor

Initiator

Is the counterparty that sends orders

Acceptor

Is the counterparty that receives and executes those orders

Java

Session

Acts as the communication channel

Let's build these entities using Java and Spring!
